# Cal Poly Art and Design Kyocera P8060cdn - Bypass Tray Settings

Kyocera Bypass Tray

Written By: Art Tech

# INTRODUCTION

-

-

How to select the **Bypass Tray** on a Kyocera P8060cdn as the paper source.

The primary OS print dialog box function for selecting the **Bypass Tray** is inconsistent. Use these steps to successfully change the paper source tray.

Screen captures are from Adobe Acrobat.

## Step 1 — Select the Printer button

 Start the normal printing process, and configure settings as needed in the Application **Print** dialog box (number of pages, two-sided printing, paper size, etc,) and then click on **Printer** at the bottom.

#### Step 2 — Select the Print Panel Info button

	Printer	GD150-Kyocera-P8060CDN (34-150 Graphic Design)	
Ĺ	Presets	Default Settings 💲	
	Copies	1 ≎	Help

	2 PDF -	Cancel Print	

• From the **Printer** dialog box, click on the **Print Panel** Info button.

## Step 3 — Select Settings button

• Next, click on the **Settings** button.

#### Step 4 — Select Bypass as Source

- From the **Basic** settings on left, click on the **Source** drop-down, and select **Bypass Tray**.
- Click **OK** in this dialog box to save and close.
  - If prompted to authenticate, click Cancel to close the window. The settings will stick even without authentication.
- Click OK or Print on each of the open dialog boxes to close, working back to the primary Print window.

# Step 5 — Verify settings and Print

- Back on the primary **Print** window, verify all settings are correct for this print job.
- Load or verify the correct paper is loaded in the Bypass Tray on the printer.
- Click the **Print** button to send this print job to the printer.
